

China Fast cheap high quality 180*6*22mm metal grinding disc factory price

180*6*22mm metal grinding disc is very popular especially in African countries, such as Nigeria, Cameroon, Kenya, Ghana, Uganda, South Africa and so on, the customers there prefer good quality instead of bad quality. In order to produce the best quality and most suitable fast cheap high quality 180*6*22mm metal grinding disc, we have done a lot experiments here in China. You know that different markets have different requirements for different discs, in Nigeria, customers may want the 180*6*22mm metal grinding disc to work more faster, while in some other countries, the customers may want it work more durable, the good news is that we can make it both faster and more durable, that is why customers shall choose us with China cheap grinding disc price.

For the raw material

Our factory is located in the beautiful mountain area, in the beautiful mountain area, there is raw material aluminum for the high quality metal grinding disc, 70% of the raw material for the 180*6*22mm metal grinding disc is produced here in Henan province with China cheap grinding disc price, very near to our factory in Zhengzhou. To produce fast cheap metal grinding disc, and if you want it high quality metal grinding disc, you must use the best quality aluminum or white aluminum, we always buy the best quality aluminum as raw material, even it is expensive, we still buy it.

As for the producing

The producing for Fast cheap high quality 180*6*22mm metal grinding disc include several steps, first, we select the best quality aluminum, white aluminum for different 180*6*22mm metal grinding disc, second, we choose the most suitable resin bond and resin powder. Then blend the aluminum and resin bond, the resin bond can make the raw material blending very well, at the same time, it can enhance the stability of the fast cheap metal grinding disc.

After the blending, we need to put the blended material under some cold temperature like 18 degree for some hours, till the raw material is fixed and very stubborn, and very stable, we will use the blended material and put it to feed the machine, with the skilled work of our workers, and good accurate of our machines, the high quality metal grinding disc can be formed to in the standard shape of what customers need, we can adjust the thickness according to customers' need, for example, the same size 115*1.0*22, if you want it to be 115*1.2*22 or 115*1.6*22, there is no problem, we

just adjust the thickness for you by using the same machine, it is very fast and finally the products will meet your demand. After the forming of the disc, we will use the standard furnace to burn the high quality metal grinding disc for 24 hours, when it is fast and durable enough, our workers will take it out.

The developing of our factory and the technology

Our factory was founded in 1992, there were many factories built to produce Fast cheap high quality 180*6*22mm metal grinding disc, during that time, in the first 20 years, the business was very good, most of the factories produced 180*6*22mm metal grinding disc for the Chinese customers, with the economy developing, many factories started to produce fast cheap metal grinding disc for foreigners, the business ran very well, while little by little, many companies fight for the orders, they used cheap price to attract customers, and got the orders very easily, while finally, the price of the order is the sacrifice of the quality of the high quality metal grinding disc .With time goes on, a lot of factories were closed because of losing customers by using bad quality.

As we know, Zhengzhou, our factory location, is the original place where our country started to produce abrasive materials, dating back to 1962, when the Chinese economy started to develop, the second abrasive factory was founded in Zhengzhou, and our government supported this factory a lot, our performer vice president once came to our factory to visit and guide the work, the factory was developing very well, and this factory had trained a lot of technicians, and the technicians in our factory were most from this factory, the technology just spread. It is the foundation for us to produce the fast working grinding wheel.

We always won good feedback from customers for high quality grinding disc factory price for different types of discs, even it is bad feedback, through our hard working, we can turn it to good feedback, we can win good feedback from customers by supplying super quality cutting and grinding discs.
