

Company Information

We are a professional manufacturer of sharp and durable cutting wheel. One of the most influential company supplies hot sale cutting wheel in Asia.

Because of more than 20 years manufacturing experience for Cutting disc, we create unique competitiveness. We always put "Customer first, quality first, service first" as our AIM, this makes our company take the leading position in a sharp and durable cutting wheel market.

We have an office in Zhengzhou Henan China, the silicon carbide base, which boasts excellent geographical location and integrated road, railway and air transportation network extending to all directions. We always carry through the cooperation principles "customer first, honesty, quality assurance, creating the brilliancy together". Because of the good working performance, our cutting disc is named the sharpest tooth by our customer.

We pay 100% attention to the quality of hot sale cutting wheel. The product cutting disc quality must be controlled from the source, the material of cutting disc must be selected strictly. The international advanced production technology and equipment can make sure that there is no mistake in manufacturing cutting disc process. we are proud of S.AURORA cutting disc, not only the production technology, but also each batch of cutting disc will be taken a quality test to ensure perfection, we never neglect any tiny piece. Including material selection for cutting disc, Design logo, Print Packing. Etc.

We will be your friend with honesty, try our best to be your best manufacturer with trust, to be your best partner.

Production Process

We can supply all kinds of hot sale cutting wheel. Such as supply hot sale 9" 230*3*22 mm sharp and durable cutting off the wheel. When we produced 9" 230*3*22 mm flat cutting disc.

We will choose Black color gravel and light yellow Fiber web. The Firstly, Mixing the material---The second, cooling mixed materials---The third, Weighing for each item----The Fourth, Material addition according to the mold---The Fifth, Screening the material---The sixth, Place the label on the 9" Cutting disc, then through the pressing and heating by the machine. The most important is testing the balance for the 9-inch cutting disc. We will pick out the unbalanced cutting disc because they are unstable after production. It will be very dangerous to use. The last one is stoving hot sale 9" cut off wheel Resin EN12413 Cutting discs, after more than ten hours of calcination, these samples 230*3*22 mm Resin EN12413 Cutting discs items were finally completed.

Before packing, each piece of 230*3*22 mm Resin cutting disc must pass the strict screening. Such as safety tests, work efficiency test, quality tests, etc. Only with the absolute quality and passing tests, the product for 9-inch cutting disc could leave our workshop. The finally we can

pack Super thin Cutting disc 230*3*22 mm according to the customer requirement. Then the items of 9-inch cutting disc can be a load.

Product Export Range

We are one of the sharp and durable cutting wheel supplier Top Company in China. Our products are exported to more than 50 countries. Exported to the Middle East, South Africa, South America, and Asia. Such as the United Arab Emirates, Singapore, Kuwait, Cambodia, Azerbaijan, Sri Lanka, Australia, Nigeria and so on.

We know The 9 inch 230*3*22 mm sharp and durable cutting off wheel is Hot sell in Nigeria. And they like high quality and cut faster 230*3*22 mm cutting disc. My customers told us that The Consumption in the Nigeria market for each day. It about is Tens of millions for one day in the whole Nigeria market. This is an amazing number when I hear it. Obviously, this size 230*3 mm sharp cutting off wheel is selling very well in Nigeria.

A customer from South Africa, when we discussed, He told us The 230 mm EN12413 resin sharp Cutting disc sell well in the market. And they want to purchase Grade a quality cutting disc with a Competitive price. Now they would like to choose Chinese suppliers. As we know, China has many manufacturers. And the price will be cheaper than another country. So many customers will choose import cutting disc from China. It will save some cost.
